

Dottorato di Ricerca Internazionale in Biologia Strutturale

CERM, University of Florence

An International Doctorate in Structural Biology

In collaboration with  Biozentrum, University of Frankfurt
 Bijvoet Center, University of Utrecht

The topics

NMR spectroscopy
Protein Expression
Structural Biology
Bioinformatics
Functional Genomics
Bioinorganic Chemistry

The infrastructure

Excellent NMR instrumentation
High performance computational tools
Biophysical research facilities
Molecular biology research facilities
Access to synchrotron radiation sources

The teaching program

Stimulating scientific environment
International teaching panel
Training courses
Participation in international conferences

Mobility

Mobility within the partner institutions and beyond.

Conditions

- A 4-5 year undergraduate background in one of the following areas: chemistry, pharmaceutical chemistry, biology, agricultural sciences, physics, mathematics, informatics.
- Enthusiasm towards the challenge represented by the life sciences is required

Continuous pre-training:
anytime is good to start!

Apply now!
