

Pre and post partum Risk Table for activities inside CERM

WORKING AREA	CHEMICALS	BIOLOGICAL AGENTS	GMO	ELECTROMAGNETIC FIELDS	VDU
BIOLOGY LABORATORY	Not present	Incompatible	Incompatible	Not present	Not presente
BIOTECHNOLOGY LABORATORY	Incompatible	Incompatible	Incompatible	Not present	Not presente
MAGNETIC RESONANCE LABORATORY	Not present	Not present	Not present	Incompatible	Incompatible
CHEMISTRY LABORATORY	Incompatible	Not present	Not present	Not present	Not present
ADMIN / OFFICE	Not present	Not present	Not present	Not present	Compatible as from document on risk rating

The risk incompatibility shown in the above table, for pre partum and post partum state, takes effect when pregnancy is communicated to the Department Director.

As precaution, the structure Responsible, will immediately move the employee to a lesser or a not present risk rated place, as the table shows. The Responsible will also inform the Prevention and Protection Service of the University.

The Prevention and Protection Service, with the appropriate Doctor, when necessary, will verify, through more precise evaluations of the activity performed, the real incompatibility stated, confirming the need to move the employee or limiting her with appropriate prescriptions.

I hereby state to have read the above table.
